課程宗旨： Course Objectives	This course aims to enhance students' professional English presentation skills in the field of architecture and design. The course content focuses on the following four aspects: (1) English Presentation Skills: Students can present fluently in English with relevant professional terminology, clearly articulate design concepts, explain and discuss design details, as well as respond to audience questions. (2) Listening Comprehension: Students can understand and analyze presentations related to architecture and design, identify key points and design concepts, and provide constructive feedback and suggestions. (3) Slide Preparation: Students can create clear and professional presentation slides to show design concepts and technical details effectively. Based on the objectives and audience needs, students can apply visual design principles in their slides to ensure logical layout and visual appeal. (4) Design Reflection: Students can evaluate design works from multiple perspectives, considering factors such as functionality, aesthetics, environmental impact, and socio-cultural context. They can reflect on the theoretical and practical implications of design and propose specific suggestions for improvement and adjustments. The above goals aim to enhance students' ability to communicate effectively in English, present professionally, and engage in critical thinking in the field of architecture and design.
