課程宗旨： This course explores the role of creativity in marketing and how it can be applied to develop meaningful and effective brand solutions. Students will engage in creative thinking and idea development while learning how creativity connects with marketing strategy, brand positioning, and audience perception. Key theories and concepts related to creativity will be introduced and discussed in relation to real marketing practice. Instead of learning creative tools separately, the course brings together psychological insight, visual communication, cultural understanding, and strategic thinking as part of an integrated creative process. Students will learn how to turn ideas into clear brand concepts and practical marketing proposals. Course Objectives
