<p>課程宗旨： Digital platforms, defined as a digital place where multiple parties jointly create value for customers, have become an integrated part of a firm's strategy and our lives. In fact, way back to 2013, 14 of the 30 largest brands in the world were platform companies. Platform-based companies (e.g., Google, Facebook, Amazon, eBay, VISA, Mastercard, etc.) have merged as a dominant force in reshaping the landscape where and how businesses compete. Platform-based strategies transform the old economy to a new one where netizens handle their daily lives on the Internet. Given this mega trend, a deeper understanding of this direction of change is indispensable. Therefore, this course aims to explore the unique features of a multi-sided platform and associated strategic challenges from theoretic foundations and practices to equip students with capabilities to rethink the impact of Internet-based platforms on strategy, marketing, operations, and the most importantly, the economic fundamentals upon which the business is built.</p>	
<p>課程大綱： WK1 Course orientation Outline of Lectures WK2 Economic foundations of the platform business (1/2) WK3 Economic foundations of the platform business (2/2) WK4 Architecture of platform business WK5 Launch of platform business WK6 Business model of platform WK7 Monetize the platform model WK8 Midterm Examination WK9 Group presentation on (1)an example of a promising platform-based company; (2) preliminary idea (scope) of term project WK10 Governance of platform business WK11 Ecosystem of platform business WK12 Performance measures of platform business WK13 Guest Speaker: How to build and operate a successful platform business WK14 Competition and Growth of platform business WK15 Group Final Term Project Presentation WK16 Final Examination</p>
